

# NorthH Futures

**Northern Health Futures Hub for the North East and North Cumbria**

The **NorthH Futures** programme supports the responsible design and development of community-centred and data-rich healthcare technologies. The hub enables connection, collaboration and capacity building, and develops regional leadership in Digital Health.

**NorthH Futures** is a cross-sector consortium led by regional universities, partnering with local and global businesses, health and care providers, local authorities, innovation accelerators, voluntary, community and social enterprise (VCSE) sector organisations, communities and citizens.

Our **Community-centred Innovation** hub addresses unmet health and care needs, inequalities and digital exclusion, by:

- **Widening participation** in Digital Health initiatives
- **Facilitating skills training and development** in Digital, Data and AI
- **Funding collaborative research** involving community partners
- **Guiding the design of useable and useful technologies**

## Widening participation in digital health research

NorthFutures delivers events and workshops that bring people together for interdisciplinary and cross-sector knowledge exchange, skills sharing, and collaboration.

We support development opportunities, providing access to diverse experts in research, innovation, translation, and in patient experience.
